

# VANATOO TRANSPARENT ONE POWERED SPEAKERS

Elegant, compact, and affordable, Transparent One™ speakers reproduce music exactly the way it was recorded—and when combined with a wireless interface give you the convenience of wireless, handheld control from your phone or tablet. Nothing else sounds as good for the money and better fits the way you want to enjoy music.

Transparent One speakers reproduce music exactly the way it was recorded and let you control them wirelessly from a phone or tablet—so you hear just what you want, whenever you want.

Our speakers use Vanatoo ClearBass™ technology to reproduce the lowest musical registers. An aluminum cone woofer with XBL™ technology and silk dome tweeter ensure that your music remains undistorted and sweet throughout the audio range. And their integrated 60 watt/channel amplifier eliminates the stack of electronics normally required to power a set of speakers.

With analog and digital inputs, you can connect Transparent One speakers to virtually any music source. They also include all the cabling you need to have them operating within minutes of opening the box—as well as a three-year warranty with lifetime support.

## Key Features

- Automated-sensing inputs:
  - Analog (3.5 mm headphone output)
  - USB digital
  - Toslink optical digital
  - Coax digital
- Real cherry veneer cabinets (black or natural)

- Thick 3/4" MDF cabinets for improved sound
- 60 W/channel D2Audio Class D amplifier
- Integrated digital signal processor
- Left/right switch for easier positioning
- Convenient auxiliary AC power output
- Low power sleep mode
- All setup cabling
- Three year warranty and lifetime support

*"The Vanatoo Transparent One speakers have a lot going for them—multiple input sources, a built-in AC power port for use with an AirPort Express Base Station, subwoofer auto-sensing, and good sound—all in a beautiful, compact package...It's absolutely worth your time and effort to take them for a spin."*

Christopher Breen, *Macworld.com*  
August 1, 2012

*"If you like bass but can accommodate only a small speaker, you'll love the Vanatoo Transparent Ones...I'd imagine that music lovers who are also into gaming would get giddy with delight at their bass slam and prowess and while I've spent a lot of virtual ink in this nether sonic region, the Transparent Ones deliver an impressive musical package."*

Michael Lavorgna, *AudioStream.com*
